Q.2 Read the story and calculate the answer.

There was a wholesaler who had good quantity of grains such as wheat costing ₹45,78,390, rice costing ₹62,38,456, barley costing ₹ 40,78,390, different types of pulses costing ₹ 62,83,456 and all types of dry fruits costing ₹ 2,89,35, 456. One day his servant forgot to close the windows of his shop and went back home. Due to rain the sack of wheat and barley got wet and the grains inside get spoiled. The next day when the servant came, the shopkeeper scolded him and asked him to keep the sack of those spoilt grains in another room so that he would not sell those grains to the costumers. The servant realized his mistake and promised him that he will never repeat such mistake. The wholesaler forgave him and did not remove him from his job.

1. What is the total cost of the grains and the dry fruits the shopkeeper had?
2. Find predecessor and successor of each cost of the grains.
3. Arrange the cost of grocery in ascending and descending order.
4. How much loss did the shopkeeper face due to his servant's mistake?
5. Convert all the cost of grains and dry fruits into international system.

Q.3 Memorize and write tables from 11 to 20 in scrap book.
